(for each programme with batch of 25 participants)

LAST DATE OF ENROLMENT
10th April 2026

PERSPECTIVE

The risk of damage due to fire depends on the combustible available, their physical arrangement, the geometry of building, likelihood of ignition, etc. The risk is also controlled by fire protection measures in place, which relate to both fire prevention & fire control. Statistics reveals that nearly 8-10% of all fatalities in industries are due to fire & explosion in factories/Industries. NSC is organizing this Awareness course as a tribute to the firemen who lost their lives in devastating fire occurred at Bombay Dock in 1944.

This one day Awareness programme has been designed to provide insight into the gravity of the fire problem and the means and methods available to upgrade fire safety standard. This awareness programme is arranged for installation at concession rate only on occasion of Fire Service Week being observed all over India.
