The Role of Trade Unions & Associations in Cultivating HSE Practices

25-27 November 2026, Park Inn by Radisson, Ayodhya, Uttar Pradesh

ABOUT THE COURSE

Occupational hazards and unsafe work environment pose the risk of injuries and ill health to workers. The injury adversely affects the morale of the workers, which in turn would affect their productivity and safety.

The Trade Unions, Safety Committees and associations can make extensive contributions in promoting safety and health through their commitment, involvement and constructive approach. The participation of Trade Unions and associations in the process of safety and health in the Safety Committees makes the work environment safe. Recognizing the importance and role of Trade Union and associations in Occupational Safety and Health, a statutory provision for setting up safety committees was incorporated in OSHWC Code 2020. However, it has been found that the participation of Trade Union Representatives in the Safety Committees is not effective. As such, they should be actively involved in the efforts of the organization to influence workers to adopt safe work practices/habits. These 3 days programme has been designed to create awareness on SHE among Trade Unions, Safety Committee members and associations.

LEARNING OUTCOME

- Participants will be able to understand their problems relating to occupational safety and health at their workplace.
- Participants will be able to clearly describe their roles and responsibilities in effectively guiding the workers for the promotion of safety and health at the workplace.

COVERAGE

- Overview of Indian Statutes and Standards related to Safety and Health
- Worker's Participation in Safety Management – Structure, Role and Functioning of Safety Committee

NSCI Certified Safety Champion - Roles and Responsibility

10 – 11 December 2026, Radisson Hotel, Bhopal, Madhya Pradesh

ABOUT THE COURSE

Developing a positive safety culture in the organization is a continuous process built over the time involving all employees. In fact, it is both individual and collective responsibility and requires a positive attitude inculcated through motivation, appreciation, acknowledgement, awards, recognition etc. Although the organisations appoint qualified site safety officers, in a strong safety culture, everyone feels responsible for safety and pursues it on a regular basis. Employees go beyond the call of duty to identify unsafe conditions, behaviors and intervene to correct them. Organizations have come up with a new concept of “Safety Champions” who play vital role and supplement the efforts of management for implementing the performance-based safety programmes. Enthusiast safety champions act as role models for safety, identify safety hazards, correct the at-risk behaviours of others, and always look for opportunities to improve the Safety culture. Every employee may become a Safety Champion by implementing the Safety rules by themselves and encouraging others to do the same.

NSC has specially introduced this course to help the organisations to create a pool of Safety champions, who can become the pillars of a successful safety programme of the organisation.

LEARNING OUTCOME

On completion of this programme, the participants will be able to identify the safety hazards & non compliances at workplace, recommend the corrective actions and also understand the requirements for enhancing the Safety culture at the workplace.

COVERAGE

This course will cover following topics:

- Overview of Applicable Legal Requirements

- Role of Trade Union in Promoting Safety and Health at Workplace
- Communication for Promoting Effective Participation
- Ergonomics in Manual Material Handling
- Electrical Safety – Do's/Don'ts along with Use of Portable Electric Tools
- Work Environment (Noise, Heat, Light, Ventilation)
- Basic Principles of Accident Prevention
- Chemical Safety – An Overview
- Hazard Identification and Risk Assessment
- Fire Safety
- Portable Fire Extinguishers – Selection, Care, Use, Maintenance
- PPE – Selection, Care, Use, Maintenance

WHO SHALL ATTEND

The programme is intended for Trade Union Representatives, Safety Committee Members, Safety Officers, Safety Stewards and other Worker Technicians, Operators etc. actively involved in promotion of safety and health at work.

Safety Compliance: Testing and Examination of Lifting Machines & Tackles, Pressure Vessels

21– 23 December 2026 West End Hotel, Mumbai, Maharashtra

ABOUT THE COURSE

In factories, ports and construction sites, several operations and processes involve the use of lifting machinery, lifting tackles, chains, ropes, etc. for material handling. Pressure vessels are used in a variety of applications in both industry and the private sector. The pressure differential is dangerous, and many fatal accidents have occurred in the history of pressure vessel development and operation. Improper selection, inadequate strength, patent defects and poor operating practices, etc., are some of the known causes for failure of the lifting equipment, as well as pressure vessels which can result in fatal or serious injuries and damage to equipment, material, or other facilities.

To prevent such unwanted events, it is essential that users of these equipment's are familiar with the various safety requirements relating to their design, construction, testing, examination, maintenance, and operation. These equipment's are also required to be periodically examined and tested as prescribed under different statutes. Various Rules and Regulations under different statutes for the safe use of the lifting appliances and pressure vessels have laid down guidelines for safe operation.

This 3-day course will be conducted through classroom sessions with theoretical input followed by exercises and tests. Understanding of course will be determined through interactions & feedback of participants.

LEARNING OUTCOME

This programme will enable participants to:

- Create awareness for testing and examination of lifting machines, chains, ropes and lifting tackles.
- Developing the technical competence of the competent persons and technical persons in testing and examination of lifting appliances, pressure vessels and in enhancing their awareness in the safe use.

COVERAGE

- Relevant Statutory Provisions Under The Oshwc Code 2020 & State Rules
- Relevant Statutory Provisions Under The Dock Workers (Safety, Health & Welfare) Regulations, 1990
