Strategies for ESG Excellence

7 - 8 January 2027, National Safety Council, Hq., Navi Mumbai, Maharashtra

ABOUT THE COURSE

In today's corporate landscape, Environmental, Social, and Governance (ESG) factors play a crucial role in sustainable business practices. Among these, safety management is a key component that ensures the well-being of employees, minimizes environmental risks, and enhances corporate governance.

This two-day comprehensive training programme is designed to help professionals understand how safety management integrates into ESG frameworks and contributes to organizational resilience, regulatory compliance, and stakeholder trust. Participants will gain insights into global best practices, industry trends, and strategies to enhance workplace safety while aligning with ESG goals.

LEARNING OUTCOME

To enable participants to gain insights into risk mitigation strategies for workplace safety, learn about global standards & regulations governing ESG and safety, develop skills to integrate safety into ESG reporting & compliance, discover best practices for employee health, safety, and environmental protection, enhance corporate governance by incorporating safety culture into ESG policies.

COVERAGE

- ESG Foundations, Strategy & Governance
- ESG Reporting Standards & Frameworks (Global and Indian aspect)
- Introduction to BRSR & NGRBC Nine principles

- BRSR & ESG Report Assurance Requirements
- ESG Ratings Preparedness
- Supply Chain ESG & Scope 3
- Implementation Roadmap & Change Management
- Case Studies of ESG Best Practices In India

TRAINING METHODOLOGY

Two-day classroom programme on " Strategies for ESG Excellence" will be based on a blend of interactive lectures, case studies, group exercises, and practical demonstrations

WHO SHALL ATTEND

Top and senior management, middle management, team responsible for sustainability/ESG, individuals/professionals/ consultants who want to enhance their knowledge more about ESG,BRSR, safety & environment professionals.

NSCI Certified Scaffold Supervisor

20 - 22 January 2027, National Safety Council, Hq., Navi Mumbai, Maharashtra.

ABOUT THE COURSE

Scaffold is a temporary structure used to support people and material in the construction or repair of buildings and other large structures. Work on scaffolds and at heights makes for a large number of accidents as revealed by accident analysis. Improper designs and bad maintenance of work platform for scaffolds, non-use of proper fall protection devices and misuse or abuse of ladders are the causes of accidents.

OSHC Code 2020, The Building and Other Construction Workers Rules, 1998, made there under stipulate specific requirements for design, inspection and maintenance of scaffolds and provide for appointment of responsible person to ensure safety of scaffolds.

Scaffolding Supervisor is responsible for ensuring that all the scaffolding in Construction project and operational plants are in accordance with the prevailing standards, procedures and laws. Scaffolding Supervisor should monitor the design and certification of all scaffolding structures on site according to all relevant specifications and standards.

National Safety Council has designed these three days training programme on “NSCI Certified Scaffold Supervisor” as a part of NSC’s initiatives to promote Safety in Construction Industry. The programme gives a wider perspective of the design of scaffolds along with maintenance, supervision, inspection, record keeping and measures for prevention of falling from heights.

LEARNING OUTCOME

To enable participants to design, install, maintain and supervise scaffolds for facilitating safe working at height.

COVERAGE

- Safety While Working at Heights – An Overview
- Provisions Under the OSHWC Codde 2020, Building and Other Construction Workers Rules, 1998 related to Scaffolds and Working at Height.
- Types of Scaffolds
- Scaffold Materials
- Manual Material Handling During Construction, Erection & Dismantling of Scaffolds
- Inspection and Maintenance of Scaffolds
- Role of Scaffolding Supervisor
- Case Studies

WHO SHALL ATTEND

Project engineers, site engineers & supervisors, planning managers, safety professionals, safety committee members and line managers/executives responsible for safety in building and other construction work.

CERTIFICATE

- Participants who successfully pass the test as per NSCI criteria will receive a Merit Certificate and others will receive a Participation Certificate. (Validity 2 years)
- Certificates will be sent to the participants addresses and will include a unique identification number based on the

last four digits of the participant’s Aadhar card.

- Participants are requested to submit a soft copy of their Aadhar card during course enrolment

FEES PER PARTICIPANT

NSC Members:	Rs. 24,500/-+ Rs. 4,410/-	=	Rs. 28,910-
	(18% GST)		
Non Members:	Rs. 27,000/- + Rs. 4,860/-	=	Rs. 31,860/-
	(18% GST)		

Risk Assessment Tools & Techniques for Industrial Applications

8-9 February 2027, West End Hotel, New Marine Lines, Mumbai, Maharashtra

ABOUT THE COURSE

Hazard is a source or a situation having potential to cause harm such as human injury, ill health, damage to property, damage to environment or a combination of these. Hazard Identification is the process of recognizing a hazard in existence and defining its characteristic / impact. Similarly, Risk is the combination of frequency or probability of occurrence of an event and the damage caused by the event. Risk Assessment is the overall process of estimating the magnitude of risk and deciding whether the risk is tolerable.

Globally all safety management systems such as ISO 45001, ILO OSH Guidelines etc. Consider Hazard Identification and Risk Analysis (HIRA) as corner stone to establish a sound safety system. Moreover, industries are required to carry out HIRA for their different activities/operations as per statutory requirements. These include the OSHWC Code 2020 and State Rules, the Manufacture, Storage and Import of Hazardous Chemicals Rules 1989 (amended 2000), EIA Notification under the Environment Protection Act 1986 (amended 2000), etc.

Considering importance of HIRA, the Bureau of Indian Standards has brought out a complete standard titled “Hazard Identification and Risk Analysis – Code of Practice” IS 15656:2006 and recently IS 18347: 2023 is also developed. It provides detailed guidance on Quantitative & Qualitative Procedures.

This Two days programme has been designed by NSCI to create awareness of HIRA and provide practical guidance on carrying out HIRA for industrial operations/activities.

LEARNING OUTCOME

This programme will enable participants to get familiarized with the Hazard Identification and Risk Assessment procedures and how it can be utilized in their premises.

COVERAGE

- An Overview of Hazard Identification and Risk Assessment and Legal Requirements
- IS 15656: 2006 & IS 18347: 2023
- QRA & Job Safety Analysis
- Fundamentals of Hazard Identification and Risk Assessment
- Introduction to HAZOP Study
- Exercise on QRA, JSA, HIRA, HAZOP & Case Study
