Safety Compliance: Testing and Examination of Lifting Machines & Tackles, Pressure Vessels, 18-20 June, 2025, National Safety Council, Hq., Navi Mumbai

ABOUT THE COURSE

In factories, ports and construction sites, several operations and processes involve the use of lifting machinery, lifting tackles, chains, ropes, etc. for material handling. Pressure vessels are used in a variety of applications in both industry and the private sector. The pressure differential is dangerous, and many fatal accidents have occurred in the history of pressure vessel development and operation. Improper selection, inadequate strength, patent defects and poor operating practices, etc., are some of the known causes for failure of the lifting equipment, as well as pressure vessels which can result in fatal or serious injuries and damage to equipment, material, or other facilities. To prevent such unwanted events, it is essential that users of these equipment's are familiar with the various safety requirements relating to their design, construction, testing, examination, maintenance, and operation. These equipment's are also required to be periodically examined and tested as prescribed under different statutes. Various Rules and Regulations under different statutes for the safe use of the lifting appliances and pressure vessels have laid down guidelines for safe operation.

LEARNING OUTCOME

This program will enable participants to:

- Create awareness for testing and examination of lifting machines, chains, ropes and lifting tackles.
- Developing the technical competence of the competent persons and technical persons in testing and examination of lifting appliances, pressure vessels and in enhancing their awareness in the safe use.

COVERAGE

- Relevant statutory provisions under the Factories Act, 1948 & Rules
- Relevant statutory provisions under the Dock Workers (Safety, Health & Welfare) Regulations, 1990

- Safe Slinging Practices
- Actual Testing Procedures for Wire Rope Slings, Chain Slings, and Lifting Tackles like – Shackles, Eye Bolts etc. • Testing and Examination of Pressure Vessels Under SMPV Rules, 2016 and Factories Rules
- Inspection & Examination of Forklift & Hydra Crane.
- Inspection and Maintenance of Lifting Tackles, Chain Pulley Block, Slings
- Inspection and Examination of Lift/ Hoist
- Inspection and Examination of Mobile Crane and Tower Crane.
- Non-Destructive Testing of Pressure Vessels and Lifting Machine

TRAINING METHODOLOGY

This 3-day course will be conducted through classroom sessions with theoretical input followed by exercises and tests. Understanding of course will be determined through interactions & feedback of participants.

WHO SHALL ATTEND

- Technical persons from industries and professional institutions/organisations (Maintenance Engineers/ Supervisors, Technical Services, Engineers, Safety Professionals, etc.)
- Competent person recognized for testing & examination of lifting appliances and pressure vessels.

FEES

| | | | |
|--------------|--------------------------------------|---|--------------|
| NSC Members: | Rs. 17,600/- + Rs. 3,168/- (18% GST) | = | Rs. 20,768- |
| Non Members: | Rs. 19,800/- + Rs. 3,564/- (18% GST) | = | Rs. 23,364/- |

Role of Safety in Environmental, Social and Governance (ESG) Management, 26-27 June, 2025, National Safety Council, Hq., Navi Mumbai

ABOUT THE COURSE

In today’s corporate landscape, **Environmental, Social, and Governance (ESG)** factors play a crucial role in sustainable business practices. Among these, **safety management** is a key component that ensures the well-being of employees, minimizes environmental risks, and enhances corporate governance.

This two-day comprehensive training programme is designed to help professionals understand how safety management integrates into ESG frameworks and contributes to organizational resilience, regulatory compliance, and stakeholder trust. Participants will gain insights into global best practices, industry trends, and strategies to enhance workplace safety while aligning with ESG goals.

LEARNING OUTCOME

To enable participants to gain insights into risk mitigation strategies for workplace safety, learn about global standards & regulations governing ESG and safety, develop skills to integrate safety into ESG reporting & compliance, discover best practices for employee health, safety, and environmental protection, enhance corporate governance by incorporating safety culture into ESG policies.

COVERAGE

- Genesis of ESG reporting
- Various sustainability aspects covered in E, S and G

- Introduction to BRSR
- NGRBC Nine principles
- SDGs and BRSR correlation
- SEBI circular on BRSR- Each principle wise explanation
- Challenges in BRSR report preparation and software available
- ESG rating system by SEBI
- BRSR report assurance requirements
- BRSR Lite for private and MSMEs

Occupational Health & Hygiene at Workplace, 3 - 4 July, 2025, National Safety Council, Hq., Navi Mumbai

ABOUT THE COURSE

The work environment and its relation to worker’s health were recognized as early as in the fourth century BC when Hippocrates noted lead toxicity amongst workers employed in mining industry. Since then, industrial hygiene has been acknowledged in prevention and control of occupational illnesses all over the world.

Industrial hygiene is a science of anticipating, recognizing, evaluating, and controlling workplace conditions in relation to worker’s health and illness. Workplace monitoring and analytical methods are used to assess worker’s exposure to hazards and suggest suitable control measures.

Indian and international statutes and standards spell out discretely the industrial hygiene aspects i.e. Occupational Exposure Limits of airborne chemical contaminants, required levels of illumination and noise, removal of pollutants and heat by ventilation, workplace and environment monitoring and biological monitoring of worker etc. Implementation of these provisions is the minimum requirement for industries. However, there is a need to assess the hazardous physical conditions and chemical pollutants in the workplace and plan accordingly for a healthy and hygienic atmosphere.

NSC has scheduled this training programme on “Occupational Health and Industrial Hygiene”, aimed at acquaintance of the participants with the industrial hygiene problems, identification of the areas for improvement and designing better workplace for a better health.

LEARNING OUTCOME

At the end of the programme participants will be able to:

- Possess better knowledge of workers’ occupational exposure to chemical, physical, ergonomic, and biological hazards; their environmental / biological monitoring and the control measures at the workplace.
- Explain the concept and applications of toxicology.
- Identify the areas for improvement at their premises, provide suitable engineering and administrative controls and select appropriate PPE, explain their proper use & maintenance.

COVERAGE

- Status of Occupational Health and Industrial Hygiene in India

WHO SHALL ATTEND

Top and Senior Management, Middle Management, Team responsible for sustainability/ESG, individuals/professionals/ consultants who want to enhance their knowledge more about ESG, Safety & Environment professionals.
