ABOUT THE COURSE

Scaffold is a temporary structure used to support people and material in the construction or repair of buildings and other large structures. Work on scaffolds and at heights makes for a large number of accidents as revealed by accident analysis. Improper designs and bad maintenance of work platform for scaffolds, non-use of proper fall protection devices and misuse or abuse of ladders are the causes of accidents.

The Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 and The Central Rules, 1998 (amended 2018) made there under stipulate specific requirements for design, inspection and maintenance of scaffolds and provide for appointment of responsible person to ensure safety of scaffolds.

National Safety Council has designed this 2–day Training Programme on “Safety in Scaffolding and Working at Heights” as a part of NSC's initiatives to promote Safety in Construction Industry. The programme gives a wider perspective of the design of scaffolds along with maintenance, inspection, record keeping and measures for prevention of fall from heights.
