

# NSCI'S VIRTUAL CLASSROOM TRAINING PROGRAM ON

## Management Initiative for Improving Occupational Health and Safety Performance

24 March 2026 (Time : 01 : 00 PM – 05 : 00PM)

**PERSPECTIVE:** Occupational Health and Safety (OHS) performance refers to an organization's ability to protect its workers from health and safety risks in the workplace, ensuring a safe, healthy, and productive working environment. It involves the effective implementation of health and safety policies, programs, and practices, with the aim of reducing workplace injuries, illnesses, and accidents while fostering a culture of safety.

Achieving strong Occupational Health and Safety (OHS) performance not only helps organizations comply with regulations but also provides numerous tangible and intangible benefits. These benefits positively impact both the workforce and the organization as a whole, leading to a safer, more productive, and sustainable working environment.

A management initiative for improving occupational health and safety performance requires a comprehensive, systematic approach that encompasses leadership commitment, risk management, employee involvement, continuous monitoring, and the allocation of resources. By actively engaging all employees, measuring safety performance, and implementing corrective actions, organizations can create a safer workplace, reduce accidents, and foster a strong culture of safety.

Regular evaluations and updates to safety programs ensure that the organization remains adaptable to new risks and changes in regulations, ultimately leading to improved long-term health and safety outcomes for all employees.
