National Safety Council
(ISO 9001 CERTIFIED)

Date: June 03, 2026

Dear Members and Patrons,

We are pleased to announce the observance of **National Electrical Safety Week (NESW) 2026** from **26th June 2026** to **2nd July 2026** across the country.

Electricity is an indispensable part of modern life and industrial operations. However, electrical hazards continue to be a major cause of accidents, injuries, fatalities, fires and property damage. The prevention of such incidents requires a strong commitment to developing competency, ensuring compliance with statutory requirements and standards, and exercising caution in all electrical activities.

Building upon the core vision, the theme for this year's **NESW** campaign is "**Competency, Compliance and Caution – Ensuring Electrical Safety**"

The theme highlights three critical pillars of electrical safety:

- **Competency** – Enhancing knowledge, skills and awareness of personnel involved in electrical work.
- **Compliance** – Adhering to applicable laws, regulations, standards and safe work practices.
- **Caution** – Promoting vigilance, risk assessment and safe behaviour while working with or around electrical systems.

We appeal to all Member Organizations, Patrons, industries, institutions, utilities, government departments and other stakeholders to actively participate in the observance of **National Electrical Safety Week 2026** by organizing safety awareness programmes, training sessions, safety talks, Safety competitions, inspections, Safety electrical and fire audits and other promotional activities to reinforce the importance of electrical safety.

Let us collectively strive to prevent electrical accidents and create safer workplaces and communities through enhanced competency, strict compliance and continuous caution.

We look forward to your active participation and wholehearted support in making National Electrical Safety Week 2026 a grand success.

With Best Regards

Dr. Lalit R Gabhane
Director General

National Safety Council of India
