NATIONAL SAFETY COUNCIL OF INDIA

INTRODUCTION

- NSCI Safety Rating Scheme (NSRS) is introduced to carry out qualitative, quantitative and objective assessment of organisation's Occupational Safety, Health, Environment Management System as per the Industry specific standards taking into account National / International best practices. Based on this assessment score appropriate no. of **Golden Stars** are awarded to those organisations who opted for NSRS scheme.
- NSCI has now developed another Assessment tool to recognise and reward for demonstrating excellence in Occupational Safety, Health and Environment Management System and going beyond **Five Golden Stars** compliance.

OBJECTIVE

- To recognize extraordinary efforts of the organisation in achieving excellence in Occupational Health and Safety

BENEFITS

- Boost your organization's reputation
- Setting you apart from the crowd
- Amplified visibility of organization's efforts in Occupational Health and Safety
- Remains stakeholders confidence and gives a competitive advantage.
- Leap towards better standard in Occupational Health and Safety
- Benchmarking Safety Management Systems of the company at National Level
- Ensuring better safety culture with higher morale and confidence of working at a safe workplace.

FEATURES

- Comprehensive and objective assessment
- Benchmark against current best practices and techniques
- Endorse the success with the NSCI Safety Shield, certificate, and NSC publication coverage

SUITABILITY

- NSCI Safety Shield is suitable for all types of factories and plants, construction sites, ports, airports, hospitals, hotels, malls, IT parks and commercial establishments
