

NSCI'S VIRTUAL CLASSROOM TRAINING PROGRAM ON "Safety in Confined Space"

17 March, 2023 (Time : 02 : 00 PM)

National Safety Council of India

PERSPECTIVE: A confined space can be defined as limited or restricted means to entry and exist to an area such as pits, tanks, well, sewer, tunnel, pipe, boiler, silo, etc., which is not suitable for continuous occupancy. Each year a number of workers get injured or killed while working in confined spaces. Confined space accidents are a major concern in various industries due to their hazards. Fatalities occurs because employers fail to recognize confined space hazards and inadequate emergency response which leads to death of entrant or rescuer or both. Confined space training outlines the skills and protocols for safe entry to confined spaces which includes hazards, risks and precautions. Training needs to be conducted not only for the people working in the confined space, but also for the managers, supervisors and other personal associated with confined space, who are without adequate training. This training programme gives a perspective of the principles related to safe working with confined spaces.

OBJECTIVE: On completion of this program, the participant will be able to understand confined spaces hazards and risks involved with their control measures and importance of monitoring methods, permits, exposure limits and ventilation.

TOPIC: This virtual class room training program will cover following topics:

- Scope & Definition of confined space.
- Understanding statutory requirements for Confined space.
- Associated hazards and risk.
- Hierarchy of control with respect to Confined Space
- Roles and Responsibilities of entrants, attendants, entry supervisors and contractors.
- Safety equipment and pre-use checks.
