

National Safety Council of India

NSCI'S VIRTUAL CLASSROOM TRAINING PROGRAM ON
Process Safety Management Essentials
13 – 14 August 2024

Program Fee: Rs. 5200/- plus 18% GST (Total Rs.6136/-) per participant

PERSPECTIVE: Process Safety Management (PSM) is an application of management systems to the identification, understanding, and control of process hazards to prevent process-related injuries and incidents. PSM improves overall safety performance by organizing safety-related activities in a consistent manner that assures and promotes continuous improvement in efficiency of plant and reliability and reduce downtime, rework, and waste. A sound PSM system needs the input, expertise, and support of a wide range of our people. A multidisciplinary, interdivisional team would provide the insight and the skills this initiative requires. Such a team should include experts from all four divisions, as well as representatives from corporate staff. PSM is a cost-effective means of improving safety performance that also offers us the opportunity to improve efficiency, realize cost savings; and achieve competitive advantages. This program will provide the guidance to the participants on the significance of PSM.

OBJECTIVE: On completion of this program, the participant will be able to understand importance of Process Safety Management and results in improved efficiencies and cost savings.

TOPIC: This 8 hour video based virtual class room training program will cover following topics:

- Overview of PSM and Employee Participation.
- Process Hazard Analysis.
- Mechanical Integrity
- Pre startup review
- Management of Change
- Permit to work
- Contractor Management
- Emergency Planning and response.
