Scaffolding Supervisor and Requirements, 25 – 26 July 2024, National Safety Council, Hq., Navi Mumbai

ABOUT THE COURSE

Scaffold is a temporary structure used to support people and material in the construction or repair of buildings and other large structures. Improper designs and bad maintenance of work platform for scaffolds, non-use of proper fall protection devices and misuse or abuse of ladders are the causes of accidents.

The Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 and The Central Rules, 1998 made there under stipulate specific requirements for design, inspection and maintenance of scaffolds and provide for appointment of responsible person to ensure safety of scaffolds.

Scaffolding Supervisor is responsible for ensuring that all the scaffolding in Construction project and operational plants are in accordance with the prevailing standards, procedures and laws. Scaffolding Supervisor should monitor the design and certification of all scaffolding structure on site according to all relevant specifications and standards. National Safety Council has designed this 2 – days Training Programme on “Scaffolding Supervisor and Requirements” as a part of NSC’s initiatives to promote Safety in Construction Industry. The programme gives a wider perspective of the design of scaffolds along with maintenance, supervision, inspection, record keeping and measures for prevention of fall from heights.

LEARNING OUTCOME

To enable participants to design, install, maintain and supervise scaffolds for facilitating safe working at height.

COVERAGE

- Safety While Working at Heights – An Overview
- Provisions under the Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 and The Central Rules, 1998 related to scaffolds and working at height.
- Types of Scaffolds & Scaffold Materials
- Manual Material Handling during Construction, Erection & Dismantling of Scaffolds
- Inspection and Maintenance of Scaffolds
- Role of Scaffolding Supervisor.
- Case Studies

WHO SHALL ATTEND

Project Engineers, Site Engineers & Supervisors, Planning Managers, Safety Professionals, Safety Committee Members and Line Managers/Executives responsible for Safety in building and other construction work.

VENUE

National Safety Council,
Plot No.98A, Institutional Area, Sector 15,

Phone: 022 – 2752 2862-64/27522801

FEES

NSC Members:	Rs. 14,300/- + Rs. 2,574/- (18% GST)	=	Rs. 16,874/-
Non Members:	Rs. 16,500/- + Rs. 2,970/- (18% GST)	=	Rs. 19,470/-

Workshop on Accident Reporting, Investigation and Analysis, 8 – 9 August 2024, West End Hotel, Mumbai.

ABOUT THE COURSE

An accident is not a single event, but rather is the transformation process by which an activity or process is interrupted with accompanying unintentional harm. The Factories Act, 1948, the State Factories Rules and several other statutes have laid down the requirement for accidents reporting and its investigation. This tool is effective for

reducing the possible unsafe acts and unsafe conditions and in turn lowering the health and safety risk arising out of the hazards in the plant.

The investigation of accident / incident is generally taken up by the industries such as manufacturing sector, chemical process plants, construction sites, etc. However, finding the root causes and deficiencies in the safety management system and the immediate factors that would have prevented the accident to occur are often missing.

In fact the recommendations of the investigation can lead to positive change in several areas of plant namely improvement in training, operating manual, emergency response procedure etc.

This workshop would use statutory provisions and guidelines from national and international level to deliver a systematic way for accident reporting, investigation and analysis. This includes CCPS guidelines, ILO guidelines and IS 3786-2022.

LEARNING OUTCOME

This 2 days workshop will enlighten the participants on the key elements of incident/accident investigation, root cause analysis and developing corrective and preventive actions to eliminate similar incidents reoccurring.

COVERAGE

- Provisions on incident / accident investigation under various Statutes
- Requirement, principles, types and components of accident investigation
- Incident causation theories, models, and methodologies
- Formats for incident investigation and carrying out investigation
- Constraints in incident investigation and the way out
- Case studies on chemical industries, manufacturing sector, construction sector and fires
- Techniques of accident / incidents report writing

WHO SHALL ATTEND

This program will be useful for line managers, safety officers and executives who are involved in process, production, operations & maintenance of plants and projects, members of safety committee and associations.
